Changes to Home Warranty Insurance Scheme in NSW

From 01 July 2010 the NSW Government will take responsibility for underwriting and capitalising the Home Warranty Insurance Scheme.

The underwriting criteria and administrative arrangements for the new scheme will be determined by the Government acting on the advice of the Home Warranty Insurance Board who will go through a consultation period.

Claims handling, collection of premiums and the issue of certificates of insurance will continue to be administered by the private sector, following selection by competitive tender. This means that you will continue to go to a broker to apply for certificates of insurance.

of insurance will continue to be administered by the private sector, following selection by competitive tender. This means that you will continue to go to a broker to apply for certificates of insurance.

It is proposed that builders who already have eligibility with an insurer will automatically transfer across to the Government scheme from 01 July. Builders will be notified in writing of this. However, builders who have provided security to their insurer will be an exception to this. These builders will be contacted by the Government and given information about transferring to the Government insurer.

Builders will not be asked to provide bank guarantees under the new scheme. Builders who need to set up eligibility after 01 July will still need to lodge an application through a broker. Applications will be assessed by a fund agent on behalf of the Government.

For more information on these changes contact an HIA Workplace Adviser on 1300 650 620.

KEY CUTTING

Walker Bros now offers a key cutting service
