## TIMBER & BUILDING SUPPLIES

### Staffing Update

**Laurie Richards** has joined our delivery team which enables us to better meet your delivery requirements. Also we are now running to the upper North Shore on a more regular basis should this assist you.

**Kaine Grant** is assisting Hayden and Mitch in the Machining Section. Specialty profiles are able to be produced to match those more difficult projects.

**Alex Shepherd** our TABMA Merchandising Trainee is now learning the ropes from Reg in our hardware shop.

**Shelley Guest** is relieving in the accounts while Katrina is taking an extended break – maternity leave from April.

**Adam Brierley** has recently joined as a TABMA apprentice machinist and is currently assisting Rob in the Bandsaw area.

Our office team are happy to take your call – Phone 43247355, or pop in and check us out. Of course fax orders are no problem – Fax 43232398.

The local family company –  
The experts in timber

Our flooring display area gives customers the opportunity to see many species of timber flooring on the floor so a more informed choice can be made and our Builders Hardware range is designed to provide all your requirements.

Our delivery service is second to none.

### Termite Management for Builders

[www.timber.net.au/images/downloads/termites/termite\\_risk\\_management\\_builders.pdf](http://www.timber.net.au/images/downloads/termites/termite_risk_management_builders.pdf)

**Good risk management practices can help reduce the risk of damage from termite attack on buildings.**

This web-guide details these management practices; it is orientated towards helping builders and designers involved in housing construction across Australia. It starts by outlining regulatory and statutory requirements. It then provides guidelines to use in the building process. It finishes by discussing the risk of damage to houses from termites. Three major issues require special mention because of their underlying impact on the above issues:

• **Builders and designers should work together to limit possible damage by termites.**

• **The Principal Certifying Authority should check and ensure that installed systems comply with the requirements of the Building Code of Australia (BCA), and in most cases, AS3660.1 as well.**

• **Consumers should be advised that they are responsible for organising post-construction management of termite risk.**
